Raw materials

BOPP is short for "Biaxially Oriented Polypropylene", meaning two-way tensile Polypropylene film.

PE, short for polyethylene, is a kind of thermoplastic resin, polymerized from ethylene.

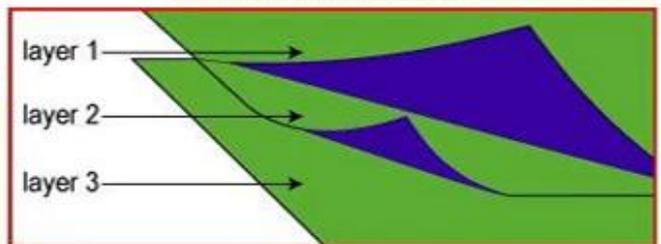

Aluminum foil is a kind of hot stamping material which directly presses a aluminium metal into leaflike film. Its hot stamping effect is similar with the pure silver foil. So it is also called false silver foil.

PET, short for Polyethylene terephthalate, which chemical formula is $-OCH_2-CH_2OCOC_6H_4CO-$, is high polymer, producing by dehydration condensation reaction of the terephthalic acid glycol ester.

Copperplate plays an important position in gravure printing, packaging printing, electrochemical aluminum hot stamping. Operation staff must be familiar with the process and control each step strictly. Otherwise it is easy to happen quality accident.
