The diagram illustrates the sequence of operations for the merge sort algorithm. It consists of a series of boxes and arrows. The first box contains two empty boxes, representing the initial array. An arrow points to the second box, which contains four empty boxes, representing the array after the first split. Another arrow points to the third box, which contains two empty boxes, representing the array after the second split. A fourth arrow points to the fifth box, which contains four empty boxes, representing the array after the first merge. A fifth arrow points to the sixth box, which contains two empty boxes, representing the array after the second merge. Finally, a sixth arrow points to the seventh box, which contains two empty boxes, representing the final sorted array.
