

The individually packaged white tea is very portable and suitable for carrying around. Traditional tea packaging often does not provide convenient and effective carrying methods, making it difficult for tea to be enjoyed during travel or errands. The individually packaged white tea, with its compact and aged appearance and portable feature, allows consumers to enjoy its unique taste anytime and anywhere. The independent small packaging can better maintain the freshness of the white tea. Tea in traditional packaging is prone to moisture and oxidation, which can degrade its taste and quality. The independent small packaging effectively isolates air and moisture, preventing the tea from coming into contact with the external environment, thus preserving the tea's flavor and nutritional content.
