Produce Process

Produce Process

Printing→laminating→separating→folding→bag making→packing

Eight-colors Printing Machine	Laminating Machine	Serials Strip-separating Machine
		
Bag Making Machine	Folding Machine	Labeling Machine
		

Raw materials

BOPP is short for "Biaxially Oriented Polypropylene", meaning two-way tensile Polypropylene film.

PE, short for polyethylene, is a kind of thermoplastic resin, polymerized from ethylene.

Aluminum foil is a kind of hot stamping material which directly presses a aluminium metal into leaflike film. Its hot stamping effect is similar with the pure silver foil. So it is also called false silver foil.

PET, short for Polyethylene terephthalate, which chemical formula is - OCH₂ - CH₂OCOC₆H₄CO -, is high polymer, producing by dehydration condensation reaction of the terephthalic acid glycol ester.

Copperplate plays an important position in gravure printing, packaging printing, electrochemical aluminum hot stamping. Operation staff must be familiar with the process and control each step strictly. Otherwise it is easy to happen quality accident.

About us

About us

Shenzhen Panxin Industry Co., Ltd. was founded in 1999, specialized in the production and export of various kinds of plastic packing bags. Our workshop area is more than 2,000 square meters with a beautiful environment, advanced computer controlled printing equipment, packaging equipment, manufacturing supporting equipment and superb printing technology, as well as a professional service team, and a modern enterprise management mode. What's more, we have got independent export and import rights.
