Our stock zipper plastic bags are manufactured to the highest quality standards. From food preservation to product packaging, our high-performance zip lock bags are comparable to Ziploc bags.

- Great prices for wholesale zipper bags
- Manufactured to the highest quality standards
- Exceptional clarity
- Reliable zip locking closure performance
- Perfect for storing and displaying any type of product

Four Star Plastics offers Stand-Up pouches that include the most common sizes and styles used for packaging food. All of these Stand-Up pouches have a K-Style configuration, ¼" hang hole, tear notch at 1", and zip top closure at 1.5". The dimensions are O.D. (outside dimensions) which means they include the area above the zipper. They are side sealed, bottom gusseted, and are FDA and USDA approved.

Constructed from multiple layers of either poly, nylon, polyester, metallized, or foil films, Stand-Up Pouches provide a barrier for the contents inside the pouch (i.e., keeping food inside fresh). The barrier properties are measured by moisture vapor transmission rate (MVTR), oxygen transmission rate (OTR), heat resistance, puncture resistance, and tensile strength.[www.dgpanxin.en.alibaba.com](http://www.dgpanxin.en.alibaba.com)
